Gadeby is now the leading manufacturer and exporter of the Laser Engravers, which is well reputed for its high performance, long service life and durability. Over the last five years, Gadeby has steadily increased its market share by differentiating itself from the rest by adding capabilities to its innovative products and services, which enables us to cater to our customers' needs and demands in their specific industrial processes. The headquarters of Gadeby is based at Ahmedabad, Gujarat with over 50,000 sq. feet of office space for 20 employees, but with the rising demand for quick service and personalized attention to our customers we are planning to expand our production plant, by constructing a new facility, which is expected to be inaugurated in November 2016, at Sanand, Gujarat. Gadeby provides high precision laser cutters that are the best in the industry. These Laser Cutters can cut from vinyl, laminates and paper and more as well. Gadeby sets standards in its entire line of products, which is why it has won over 25 Best of the Best Awards in the past 3 years. The laser cutters can cut a wide variety of materials such as vinyl, laminates, leather, canvas, paper, cardboard, ABS and more. Laser Engravers is another product that Gadeby manufactures and sells. The Laser Engravers can cut, engrave or etch on a wide variety of materials like leather, paper, fabric, nylon, linen, plastic, wood, glass, polycarbonate, acrylic, aluminum, and more. Gadeby has various models of Laser Engravers which can be used for a wide variety of applications. Gadeby is well known for its high-quality Vinyl Cutters and Wide Format Printing, which are the best in the industry. Gadeby produces wide format printing machines which can print up to 24-in. wide at speeds of up to 40 prints per minute. The wide format printing machines have been widely used by printing companies, graphic companies and most importantly digital signage companies. These Wide Format Printers are also ideal for imprinting decals or engravings on vinyl, leather, fabric, paper, canvas, aluminum, and more. The UV Inkjet Printers, are used for printing a wide variety of materials such as vinyl, plastic, canvas, leather, paper, fabric, acrylic, aluminum, and more. These inkjet printers can be used for digital printing as well as printing 82157476af
